Week 1 - Core - Worksheet | Unit Launch - How AI System Components Interact

Name: _____ **Class:** _____ **Date:** _____

Sort each example card into the correct component column and note how it interacts.

My two questions

Write at least two questions about how the components of an AI system - data, tools and prompts - interact. Aim at least one at how two parts affect each other.

_____

_____

_____

_____

Sort it: data, tool or prompt

Write each example in the right column and add one way it interacts with another component.

Example	Data / Tool / Prompt	How it interacts with another part
A folder of labelled photos		
A trained image-tagging model		
'Tag the main object in this photo'		

Our safe-use charter

Write one responsible-use rule for the class and why it keeps us safe.

Exit ticket

Exit ticket - Name one component of an AI system, say whether it is data, a tool or a prompt, and name one other component it interacts with and how. Then write one question you still have.

_____

Challenge (stretch)

Challenge - Pick a real UAE situation (for example a smart-parking app, an Arabic-English translator, or a recycling sorter) and propose how this unit's ideas about interacting components connect to it. Name the data, the tool and the prompt the system would need, and predict what a strong solution would have to get right. This stretches toward the Proficient idea of connecting the unit to a real context and predicting what a strong solution needs.
