Week 3 - Core - Worksheet | AI Solution Design & Development - Designing & Building

Name: _____ **Class:** _____ **Date:** _____

Define the problem

Write the defined problem and, in one line, what a good solution looks like.

_____

_____

Specify your components

Fill in each component for the workflow you are building.

Component	What it is in your workflow
Data	
Prompt	
Tool (AI step)	
Output	

Run and evaluate

Run your workflow, then judge whether the output solves the defined problem.

Run	Output produced	Solves the defined problem? (tick or fix)
1		
2		

Exit ticket

Name your four components in order, describe one interaction between two of them, and write one reason your output could be wrong even when it looks confident.

_____

_____

Challenge (stretch)

Challenge (stretch): Take on a defined problem of your own choosing and design a structured AI workflow to solve it - designs structured AI workflows to solve defined problems. Add a second tool step so the output of the first tool becomes the input of the next, and show how each component interaction keeps the solution reliable.

_____

_____
